

Hon. Michael K Powell, I would urge you to demonstrate your belief that less government involvement affecting the advancement of technology is the proper road to its progress.

I am concerned that The National Association of Broadcasters' attempt to curtail the broadcast selections of XM Radio is a deliberate restraint of trade and infringes not only on the rights of XM Radio but could ultimately lead to the reduction of technology advancement. The entrepreneurial spirit of XM Radio should be rewarded in a nation that was built by people with vision.

I have heard you espouse this position of encouragement on many interviews, and I'm sure you will not allow NAB to exercise their obvious oligopolistic powers to inhibit competition.
